

# IMPROVED OPERATING INCOME AND POSITIVE CASH FLOW HIGHLIGHT COOPER STANDARD'S FOURTH QUARTER AND FULL YEAR 2024 RESULTS

NORTHVILLE, Mich., Feb. 13, 2025 /PRNewswire/ -- Cooper-Standard Holdings Inc. (NYSE: CPS) today reported results for the fourth quarter and full year 2024.

## Fourth Quarter 2024 Summary

- Sales totaled \$660.8 million, a decrease of 1.9% vs. the fourth quarter 2023
- Operating income totaled \$31.7 million, an increase of \$36.2 million vs. the fourth quarter of 2023
- Net income of \$40.2 million, or \$2.24 per diluted share, reflected an improvement of \$95.4 million vs. the fourth quarter of 2023
- Adjusted EBITDA totaled \$54.3 million, or 8.2% of sales
- Net cash provided by operating activities of \$74.7 million and free cash flow of \$63.2 million

## Full Year 2024 Summary

- Sales totaled \$2.73 billion, a decrease of 3.0% vs. 2023
- Operating income totaled \$69.8 million, an increase of 51.7% vs. 2023
- Net loss of \$78.7 million, or \$(4.48) per diluted share, reflected an improvement of \$123.2 million vs. 2023
- Adjusted EBITDA of \$180.7 million, or 6.6% of sales, increased by \$13.6 million vs. 2023
- Net cash provided by operating activities of \$76.4 million and free cash flow of \$25.9 million

"We were able to deliver profit, cash flow and margin improvement essentially in line with our original guidance and expectations, despite lower production and foreign exchange headwinds," said Jeffrey Edwards, chairman and CEO, Cooper Standard. "The new organizational structure we implemented at the beginning of 2024 continues to drive significant efficiencies and cost savings and we expect to continue the momentum of operational excellence and margin enhancement in 2025."

## Consolidated Results

Free cash flow	\$ 63.2	\$ 62.1	\$ 25.9	\$ 36.5

The year-over-year change in fourth quarter sales was primarily attributable to unfavorable foreign exchange, price adjustments, and unfavorable volume and mix.

The year-over-year improvement in fourth quarter net income was primarily due to the reversal of certain deferred tax valuation allowances, lower non-cash asset impairment charges, savings generated from lean manufacturing and purchasing initiatives, normalized incentive compensation, restructuring savings, and lower raw material costs. These positive factors were partially offset by higher wages and general inflation, higher net interest expense and unfavorable foreign exchange.

The year-over-year improvement in fourth quarter adjusted EBITDA was driven by savings generated from lean manufacturing and

purchasing initiatives, normalized incentive compensation, restructuring savings, and lower raw material costs. These positive factors were partially offset by higher wages and general inflation, unfavorable foreign exchange, and unfavorable volume and mix.

For the full year 2024, the change in sales was primarily due to unfavorable volume and mix, including price adjustments, the deconsolidation or divestiture of non-core businesses, and unfavorable foreign exchange. The year-over-year improvement in full year net loss was primarily driven by the reversal of certain deferred tax valuation allowances, the non-recurrence of refinancing and debt extinguishment expense, savings generated from lean manufacturing and purchasing initiatives, the non-recurrence of pension settlement expense, restructuring savings, normalized incentive compensation and lower interest expense. These positive factors were partially offset by unfavorable foreign exchange, unfavorable volume and mix, higher wages and general inflation, and increased restructuring expense. The year-over-year improvement in full year adjusted EBITDA was driven primarily by savings generated from lean manufacturing and purchasing initiatives, restructuring savings, and normalized incentive compensation. These positive factors were partially offset by unfavorable foreign exchange, higher wages and general inflation, and unfavorable volume and mix.

### Cash Flow and Liquidity

Cash provided by operating activities in the fourth quarter of 2024 was \$74.7 million. Free cash flow (defined as net cash provided by operating activities minus capital expenditures) in the fourth quarter of 2024 was \$63.2 million, an increase of \$1.1 million compared to the fourth quarter of 2023. The increase was driven primarily by improved operating earnings, collections on trade and tooling receivables, and inventory conversion, partially offset by higher cash interest payments.

For the full year 2024, cash provided by operating activities was \$76.4 million and free cash flow was \$25.9 million. This compared to cash provided by operating activities of \$117.3 million and free cash flow of \$36.5 million in 2023.

As of December 31, 2024, Cooper Standard had cash and cash equivalents totaling \$170.0 million. Total liquidity, including availability on the Company's undrawn revolving credit facility, was \$339.2 million at year end. Based on current expectations for light vehicle production and customer demand for our products, the Company believes it has sufficient financial resources to support ongoing operations, execute planned strategic initiatives and service cash interest requirements on our debt for the foreseeable future. These financial resources include current cash on hand, continuing access to flexible credit facilities, and expected future positive cash generation.

Adjusted net loss, adjusted EBITDA, adjusted loss per diluted share and free cash flow are non-GAAP measures. Reconciliations to the most directly comparable financial measures, calculated and presented in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"), are provided in the attached supplemental schedules.

### Automotive New Business Awards

The Company continues to leverage its world-class engineering and manufacturing capabilities, its innovation programs and its reputation for quality and service to win new business awards with its customers and capitalize on positive trends associated with electric vehicles. For the full year 2024, the Company received total net new business awards representing \$181.4 million in incremental anticipated future annualized sales. The total included \$105.8 million in net new business awards on electric vehicle platforms.

## Outlook

Industry projections anticipate global light vehicle production will be lower in 2025 compared to 2024. Inflationary headwinds are expected to continue. The Company expects to continue driving operating efficiencies to offset the production volume and inflation headwinds. As a result, Company management expects to deliver improved financial results in 2025 vs. 2024. Initial full year 2025 guidance ranges for key financial measures are as follows:

	2024 Actual Results	Initial 2025 Guidance <sup>1</sup>
Sales	\$2.73 billion	\$2.7 - \$2.8 billion
Adjusted EBITDA <sup>2</sup>	\$180.7 million	\$200 - \$235 million
Capital Expenditures	\$50.5 million	\$45 - \$55 million
Cash Restructuring	\$26.5 million	\$20 - \$25 million
Net Cash Interest	\$97.3 million	\$105 - \$115 million
Net Cash Taxes	\$19.1 million	\$30 - \$35 million
Key Light Vehicle Productions Assumptions (Units)		
North America	15.5 million	15.1 million
Europe	17.1 million	16.6 million
Greater China	30.1 million	30.2 million
South America	3.0 million	3.1 million

<sup>1</sup> Guidance is representative of management's estimates and expectations as of the date it is published. Current guidance as presented in this press release considers January 2025 S&P Global (IHS Markit) production forecasts for relevant light vehicle platforms and models, customers' planned production schedules and other internal assumptions.

2 Adjusted EBITDA is a non-GAAP financial measure. The Company has not provided a reconciliation of projected adjusted EBITDA to projected net income (loss) because full-year net income (loss) will include special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end. Due to this uncertainty, the Company cannot reconcile projected adjusted EBITDA to U.S. GAAP net income (loss) without unreasonable effort.

#### Non-GAAP Measures

EBITDA, adjusted EBITDA, adjusted EBITDA margin, adjusted net income (loss), adjusted earnings (loss) per share and free cash flow are measures not recognized under U.S. GAAP and which exclude certain non-cash and special items that may obscure trends and operating performance not indicative of the Company's core financial activities. Net new business is a measure not recognized under U.S. GAAP which is a representation of potential incremental future revenue but which may not fully reflect all external impacts to future revenue. Management considers EBITDA, adjusted EBITDA, adjusted EBITDA margin, adjusted net income (loss), adjusted earnings (loss) per share, free cash flow and net new business to be key indicators of the Company's operating performance and believes that these and similar measures are widely used by investors, securities analysts and other interested parties in evaluating the Company's performance. In addition, similar measures are utilized in the calculation of the financial covenants and ratios contained in the Company's financing arrangements and management uses these measures for developing internal budgets and forecasting purposes. EBITDA is defined as net income (loss) adjusted to reflect income tax expense (benefit), interest expense net of interest income, depreciation and amortization, and adjusted EBITDA is defined as EBITDA further adjusted to reflect certain items that management does not consider to be reflective of the Company's core operating performance. Adjusted net income (loss) is defined as net income (loss) adjusted to reflect certain items that management does not consider to be reflective of the Company's core operating performance. Adjusted EBITDA margin is defined as adjusted EBITDA as a percentage of sales. Adjusted basic and diluted earnings (loss) per share is defined as adjusted net income (loss) divided by the weighted average number of basic and diluted shares, respectively, outstanding during the period. Free cash flow is defined as net cash provided by operating activities minus capital expenditures and is useful to both management and investors in evaluating the Company's ability to service and repay its debt. Net new business reflects anticipated sales from formally awarded programs, less lost business, discontinued programs and replacement programs and is based on S&P Global (IHS Markit) forecast production volumes. The calculation of "net new business" does not reflect customer price reductions on existing programs and may be impacted by various assumptions embedded in the respective calculation, including actual vehicle production levels on new programs, foreign exchange rates and the timing of major program launches.

When analyzing the Company's operating performance, investors should use EBITDA, adjusted EBITDA, adjusted EBITDA margin, adjusted net income (loss), adjusted earnings (loss) per share, free cash flow and net new business as supplements to, and not as alternatives for, net income (loss), operating income, or any other performance measure derived in accordance with U.S. GAAP, and not as an alternative to cash flow from operating activities as a measure of the Company's liquidity. EBITDA, adjusted EBITDA, adjusted net income (loss), adjusted earnings (loss) per share, free cash flow and net new business have limitations as analytical tools and should not be considered in isolation or as substitutes for analysis of the Company's results of operations as reported under U.S. GAAP. Other companies may report EBITDA, adjusted EBITDA, adjusted EBITDA margin, adjusted net income (loss), adjusted earnings (loss) per share, free cash flow and net new business differently and therefore the Company's results may not be comparable to other similarly titled measures of other companies. In addition, in evaluating adjusted EBITDA and adjusted net income (loss), it should be noted that in the future the Company may incur expenses similar to or in excess of the adjustments in the below presentation. This presentation of adjusted EBITDA and adjusted net income (loss) should not be construed as an inference that the Company's future results will be unaffected by

special items. Reconciliations of EBITDA, adjusted EBITDA, adjusted EBITDA margin, adjusted net income (loss) and free cash flow follow.
